### NTERESTING OFFICIAL STATISTICS OF CITIES

Washington, Dec. 29.-The total ength of sewers of all classes reportthe United States which in 1907 had an estimated population of over 30,fortune," replied the man politely. It 000 each was 22,866.4 miles, according was not her husband.-Kansas City to U. S. Census Bulletin 105, prepared by Mr. E. H. Maling, division in charge of the official statistics of cities, who has submitted it to Director Durand.

The sewerage system of Atlantic City, N. J., is not included in these young professor of vocal culture, private corporation. New York City, which is first in rank in population in the country, is also first in rank in miles of sewers, while Chicago is a close second.

The only large city in the country conspicuous for the small number of miles of sewers is Baltimore, Md., with a total mileage of only 62.3.

Of the total mileage shown for moving into new apartments went to 74.9 per cent, consisted of combined sanitary and storm sewers; 4,563.2 miles, or 22.0 per cent, of sanitary sewers; and 1,180.4 miles, or 5.2 per cent of storm sewers. The combined is the prevailing type of sewer in all the large cities of the country, and particularly in the northern citles. Many of the southern cities are conspicuous for reporting no sewers of this type.

Tile Leads Other Materials Classified with reference to char acter of materials of which constructed, 26.8 per cent of the total milenge was built of brick, 69.7 per cent of tile, and 3.5 per cent of all other materials. A much larger proportion of the brick sewers, which are generally of large dimensions, was reported from the cities having each a population of over 100,000 than from the cities population, and a muo oec. proportion of the storm sewer strong; of the sanitary sewers

was cora \$4. aterial. The 6.25; a of the disposal of sew-

age in a; cowsway as not to endanger the healt \$7.25 water supply of the \_\_\_ neighboring commun-

neighboring communities is a serious one for many communities roi.

The bull states that an effort was made the daily volume of sewage in gal of flowing through the sewers, and cough the figures obtained. ers, and cough the figures obtained this inquiry are largely climates, approximately corrects on the sewing is pumped. In England the average per capita of sewage about 35 gallons, in the United is 34 gallons. In the United owing to the free use of water and to manufacturing wastes, the average daily flow is much greater. For a number of the smaller cities in Massachusetts it is estimated at 100 gallons, and for the south metropolitan district of Boston and nearby cities it is over 250 gallons.

In 33 cities the sewage is pumped purification have been installed. Street Improvements.

One of the tables shows the area in square yards and the length in ceeded in finding the spot where the miles of paved and improved streets. The classification, according to character of paving or improvement, is on and theregreater number keep taining this infor varying accuracy.

More than one-third of the cobblestone payements was reported from Baltimore, Md., and nearly another third from Philadelphia, Pa., Buffalo, N. Y., and Cincinnati, O. More than two-thirds of the wooden block pavement was reported from Chicago, III., and Detroit, Mich. The other kinds of pavement are common to a large number of cities, although many of the large southern cities are conspicuous for reporting none or but small

areas of macadamized streets. In comparison with similar statistics for 1905, brick and asphalt pavements have decidedly increased in favor, and bituminous macadam even more, the increase in these classes of pavements have been at the expense of wooden block, cobblestone, gravel, granite and Belgian block.

Grade Crossings Disappearing. The total number of crossings of streets by steam railroads reported for 1907 was 17,848, of which 13,718, with 65.7 per cent in 1905. These facts indicate that the most populous cities are making considerable progress in

The Census Bureau uses the term "parks" with reference to those meat were gone, the sandwich, how grounds which are set apart and main ever, appearing intact as in the be-tained for the sole purpose of providing, free of charge, a place for out-"Why don't you eat up your and door recreation for the general pubwick and not pick at it in that man- lic. The cities of over 100,000 population in 1907 having the largest such areas were New York, N. Y.; Philadelphia, Pa., and Los Angeles, Calif., "Why," he answered, looking up respectively. How One Doctor Successfully Treats Pneumonia

"In treating pneumonia," says Dr. W. J. Smith, of Sanders, Ala., "the only remedy I use for the lungs is Chamberlain's Cough Remedy. While, of course, I would treat other symptoms with different medicines, I have used this remedy many times in my medical practice and have yet failed to find a case where it has not controlled the trouble. I have used it myself, as has also my wife for coughs and colds repeatedly, and I most willingly and cheerfully recommend it as superior to any other cough remedy to my knowledge." cough remedy to my knowledga.'
